

Introducing Transcend

Our company

Transcend is a population health management company that meets physician practices and health care systems where they are on the path to value-based medicine. We recognize the need to simplify the procedure of population health as we work with physicians to make the transition from the traditional health care reimbursement model to value-based care.

Transcend brings the value-based care model to life to achieve positive population health results and improve the operational health of physician practices.

Our vision

To transform relationships with physicians into partnerships with population health management leaders.

Our mission

Through collaborative relationships with physicians, aligned incentives and actionable information, we improve health outcomes, enhance the patient experience and lower the cost of care.

Our customers

Transcend partners directly with physicians and health care systems to improve health outcomes and create greater success for our provider partners.

We believe that health care is local, and we deploy resources locally to work directly with physicians and care teams in settings that include independent physician practices, provider groups and integrated delivery systems. Partnerships between physicians and our local support teams help communities become healthier. Transcend aligns financial incentives and works with physicians and health care systems to enhance health outcomes and reward success.

How we add value

- Partnerships that create an aligned framework and accelerate movement from volume to value
- Rapid and cost-effective deployment of resources to varying member populations in disparate geographies
- Operational and clinical services that simplify population health
- Physician governance and leadership structures that enhance physician engagement
- Rich, value-based reimbursement program including shared savings opportunities and quality incentives
- Contractual upside only, no downside risk exposure for physicians

How we help achieve success: PCP resources

- ✓ **Provider Service Consultants** visit practices regularly to support and engage physicians and staff regarding Transcend and health plan initiatives.
- ✓ **Medical Director** engages with PCPs and provides leadership for Medical Management Committee and other clinical engagements.
- ✓ **Care Navigation Nurses** work through PCPs as patient advocates to facilitate communication between care teams and patients to maximize patient health outcomes.
- ✓ **Clinical Documentation Consultants** perform chart reviews to identify accurate assignment of medical codes, needs for supporting documentation and guidance on coding specificity.
- ✓ **Quality Nurses** work with providers and staff on quality initiatives and help close gaps in care.
- ✓ **Reporting Analyst** analyzes, organizes and distributes clinical and financial reports.
